San Diego battery generation lithium phone

What is American lithium energy doing in California?

American Lithium Energy, a battery research shop primarily serving the defense sector based in Carlsbad, has secured \$13.2 million in grants from the California Energy Commission. The funding will help American Lithium Energy expand its lithium-ion manufacturing capabilities to produce 20 cells per minute. The new facility is aimed at zero-emission vehicles.

Are lithium-ion batteries safe from fire risk?

The company's lithium-ion batterieshave 15 patents related to their safety. One of its technologies, called zero-volt, enables lithium-ion batteries to be completely discharged without damaging their chemistry, reducing the fire risk during shipping or long gaps between usage. The company has 40 patents in total.

What will American lithium energy do?

American Lithium Energy plans to bulk up its production capabilities to 20 cells per minute with the funding. It aims to produce 1.5 million high-performance batteriesover the next 18 months for electric vehicles and other uses.

Are lithium-sulfur batteries self-healing?

To that end,Liu,who is also director of the school's Sustainable Power and Energy Center, and his team are developing solid-state lithium-sulfur batteries with self-healing capabilities.

When did UC San Diego issue 'charging ahead' come out?

This article originally appeared in the fall 2024issue of UC San Diego Magazine as "Charging Ahead," a companion article to " The Battery (EV)olution."

Did American lithium energy work with Northrop Grumman?

American Lithium Energy collaborated with Northrop Grummanon batteries for prototype aircraft. Northrop Grumman's electrical engineer, Jeff Knowles, confirmed this.

San Diego-based lithium battery innovator South 8 Technologies is charging up. On April 26, the company announced it had closed a \$12 million Series A funding round it will use to accelerate the commercialization of its patented Liquefied Gas Electrolyte (LiGas) technology for high-performance batteries in electric vehicle, grid storage, aerospace and defense ...
