

Sarajevo lithium battery investment list announced

Where are lithium reserves in Bosnia?

The businessman didn't disclose the specific area the new vehicle plans to target, but according to local media there are lithium reserves in the Jadra area, near the border with Serbia, as well as around Ugljevik, Domaljevac and Samac, in central Bosnia.

Did Arcore find lithium carbonate & magnesium in Bosnia?

SARAJEVO - Swiss miner ARCORE said on Friday its exploration in eastern Bosnia had found mineral deposit rich in lithium carbonate, magnesium and other minerals that are in demand in Europe.

Is there a lithium project in the Western Balkans?

The interest in developing lithium deposits in the Western Balkans is part of a wider push to exploit the mineral across Europe. Further north, European Metals Holdings is developing the Cinovec lithium and tin project in Czechia, which it says has the potential to be the lowest-cost hard rock lithium producer in the world.

Where can lithium be found in Europe?

This being the case, a growing number of companies are looking to develop lithium deposits across Europe, including in the Western Balkans, specifically Serbia, and more recently Bosnia too. International mining Rio Tinto is developing the Jadar lithium-borates project at a deposit it discovered in the Jadar river valley in 2004.

Where are lithium reserves found?

He did not specify the exact locations for the research, but it is known that in the area of Jadra, near the border between Serbia and Bosnia and Herzegovina, lithium reserves were discovered in the world.

Why are people in Lopare deposit suspicious of the Jadar Lithium Project?

People living in the region of Lopare deposit are suspicious of the project after protests just across the border in Serbia succeeded in 2022 on environmental grounds to revoke the licence granted to Rio Tinto for the Jadar lithium project.
