

Self-built house rooftop solar system installation

Can you install solar panels on a roof?

Most DIY home solar panel installations in the UK are roof mounted. As long as you're happy up a ladder, the process isn't as difficult as you might imagine. We recommend planning in advance where you'll put the panels to determine where you need to install the frames and brackets. It's a lot easier when you have a plan!

Can I install my own solar panels?

Yes, you can install your own solar panels. Sunstore Solar can provide professional installation, but we appreciate some people like to get stuck into a project. We designed our solar panel kits specifically for DIY solar panel installation projects. And what better project than providing energy security for your family or business?

Why should you install solar panels on your roof?

The rooftop solar panels are space-saving, cost-efficient aids that increase the roof's strength and reduce your electricity bill by ensuring abundant energy. Let's discover eight steps for installing solar panels on the roof, helping you reap optimal benefits from installing solar rooftop panels.

What is a roof-mounted solar panel installation?

Roof-mount solar panel installations are less intrusive and invasive, and there is no need for extensive pre- and post-installation work or construction. Roof-mounted solar panels add aesthetic appeal and blend seamlessly with roofs, making them ideal for residential rooftop surfaces.

Can I go off-grid with my DIY solar panel installation?

Yes, you can go off-grid with your DIY solar panel installation. We have solar panel kits for both on-grid and off-grid use. They are the ideal solution to our energy requirements and can power any property or leisure vehicle. Conclusion

Should I buy a DIY solar panel kit?

To save cash, you may be tempted to buy a DIY solar panel kit and fit your panels by yourself. DIY solar panels are widely available and many are excellent value compared with the cost of professional installation. For example, a full 3.4kW 10-panel kit from Plug-in Solar costs £4,728.

Any recommendations or suggestions on in-roof installation are highly appreciated. The installation will be done in two phases. Phase one, solar panel installation and then on a later date connection to the power grid and ...
