3 ???&#0183; Sodium-ion batteries are emerging as a promising sustainable alternative to lithium-ion batteries. With their use of more abundant materials and potential applications in solar lighting solutions, these batteries are gaining traction despite their lower energy density compared to lithium-ion counterparts.

Upgrading 400W High-Pressure Sodium bulbs to LED equivalents is common in street lighting, parking lots, and stadiums. LEDs deliver the same brightness with far less energy and longer lifespans.

XINHAN High Pressure Sodium Lamp Street Lamp Head 1000W, Floodlight Metal Halide Lamp

These lamps contain high levels of sodium and mercury, both of which are classified as "Hazardous". They also present the risk of explosion, fire and pollution through the leaching of mercury and as a consequence they fall under a Hazardous Waste classification in England, Wales and Northern Ireland and a Special Waste classification in Scotland.
