

Can I upgrade my solar system?

The Ultimate Guide to Upgrading While Staying in the Feed-In-Tariff (FIT) Scheme! As a proud owner of solar panels benefiting from the Feed-In Tariff (FIT) scheme, you might be wondering if you can upgrade your system to take advantage of the latest advancements in solar technology. The good news is, you can!

Should I upgrade or expand my solar panel system?

Upgrading and expanding your existing solar panel system could be your answer. When it comes to solar energy, maximizing efficiency and optimizing performance are crucial.

Should you upgrade or replace your solar panels?

Old solar panels, while still functional, might not be harnessing solar energy as effectively as the newer models. Replacing or upgrading to a more advanced model can thus translate to more electricity generation from the same square footage. Economic logic often drives homeowners and businesses to consider upgrades.

Why should you upgrade your solar panels?

Replacing or upgrading to a more advanced model can thus translate to more electricity generation from the same square footage. Economic logic often drives homeowners and businesses to consider upgrades. With improved efficiency, newer solar panels can result in decreased electricity bills.

How do I know if my solar system needs an upgrade?

Signs that your solar system may need an upgrade include lower performance than state guidelines, escalated utility bills, errors displayed by the inverter, flickering lights, and a lack of capacity in the inverter. Can I upgrade specific components of my solar system?

What should I do if a solar panel changes my fit eligibility?
