# Solar Photovoltaic Third-Party Testing Platform

What is a photovoltaic performance laboratory testing service?

Our photovoltaic performance laboratory testing services for solar panel products provides independent verification of warranty claims, endurance, output, and functionality in a variety of climate or conditions.

## Where are PV Testing & Certification centers located?

Our state-of-the-art PV testing and certification centers provide both safety and performance testing from a single source,including facilities in: Shanghai,China; Taipei,Taiwan; Cortland,New York; and Lake Forest,California.

## Why are PV modules important?

PV modules are important components in PV power plant. Whether in open fields, deserts, on the roofs, different environments put higher demands on the quality and reliability of PV modules. DEKRA is able to provide a wide range of services for PV modules, including crystalline silicon, thin-film, integrated building and concentrated PV modules.

#### What UL standards do PV modules meet?

Partner with us today We provide expert Electrical Safety Testing and certification for PV modules to the requirements of UL 1703,UL 1741,ULC/ORD-C1703-1,CSA22.2 No 107.1 and many other PV standards including IEC 61215,IEC 61646,IEC 61730-1 and IEC 61730-2.

#### Why do you need a solar safety test?

Through testing, inspection and certification, we help you increase confidence in the reliability of your renewable energy technology. Safety testing for the evolving solar industry is as necessary today as it was 125 years ago when electric lighting became mainstream.

## Do solar panels need safety testing?

Safety testing for the evolving solar industry is as necessarytoday as it was 125 years ago when electric lighting became mainstream. Depending on your place in the value chain, there are several types of testing for both photovoltaic (PV) panels and peripheral equipment.

OE Solar provides third party testing to ensure the proper performance of your build. Testing can be done on new construction & existing solar farms for performance issues. Likewise, OE solar can also perform testing for proper bonding and performance of the entire power plant including (but not limited to) breakers, surges, underground shorts location & grid performance.

As a globally respected third-party certification provider, we evaluate your products for compliance, help you access global markets and stand out from the competition in an increasingly competitive industry.

Solar Photovoltaic Third-Party Testing **Platform** 

Differentiate your Photovoltaic (PV) products in a competitive market by substantiating your value

proposition and marketing claims with independent, third-party performance testing from Intertek

Confident in the quality of their equipment and processes -- Jiangsu Runda PV Co.,Ltd has opened their doors

to an independent third party inspection service provider. The data ...

The periodic testing of the electrical cabling and components associated with solar PV systems will ensure the

safe operation of the system and reduce the potential fire risk associated with any electrical faults. ...

Image: SolarEdge. Since solar panels are static, there's little to actually, well, see when they're generating.

Sure, it's nice to start receiving smaller energy bills but, if you're like most of our customers, you'll want to

dig ...
