

Why should a solar PV system be connected to the grid?

For financial benefit. Connecting your solar PV system to the grid allows you to take advantage of the FIT, which gives you a fixed amount of money for each kWh of electricity you generate. On top of these payments for energy generation, you also receive a sum of money for feeding any surplus energy into the grid.

How do I install my Own on-grid system?

Follow the step-by-step guide below to install your own on-grid system: Before diving into the installation process, it is crucial to evaluate your energy needs. Assess your monthly electricity consumption to determine the appropriate size of the solar system required.

Can a solar PV system be connected to the National Grid?

While it is possible to have a solar PV system that is not connected to the National Grid, choosing not to connect means missing out on potentially lucrative incentive schemes like the government's Feed-In Tariff (FIT). Here is a list of FAQs on connecting to the National Grid.

How to install solar panels safely?

Secure the mounting systems onto the selected surface, whether it is a rooftop or ground level. Ensure that the mounting systems are securely fastened and aligned properly to support the weight of the solar panels. Follow the manufacturer's instructions to guarantee a safe and efficient installation.

What is an on-grid Solar System?

This connection allows excess energy generated by the solar panels to be fed back into the grid, resulting in the generation of credits or a reduced electricity bill. On-grid systems consist mainly of solar panels, an inverter, and a net meter. The solar panels, typically installed on rooftops, capture sunlight and convert it into electricity.

Do I need permission to supply energy to the grid?

For larger systems (anything above a 3.68kW output), the DNO needs to give permission before you can start supplying energy to the grid. They will investigate whether the grid in your area can handle the extra energy that your system generates, and will identify any improvements that might need to be made in order for it to do so.
