

What is solar street lighting?

Solar street lighting is an excellent solution for temporary or essential works lighting. Solar lights, using redeployable solutions such as the below concrete blocks, can be installed quickly without the need for a mains connection, providing immediate illumination. This flexibility is beneficial for essential work or emergency repairs.

Is solar street lighting a sustainable choice?

With solar lighting, you're in control of your lighting needs. Once installed, solar street lighting operates at virtually no cost. With no ongoing electricity expenses, solar street lighting is not just a sustainable choice, but a financially savvy one. This is especially true as global energy prices continue to rise.

Is solar street lighting a viable solution in the UK?

Solar street lighting is becoming an increasingly attractive and sought-after solution in the UK.

What is vibrant solar street lighting?

At Vivid Solar Street Lighting we design and build carbon neutral solar lighting solutions that work as an alternative to conventional street lighting in both commercial and domestic settings.

Do solar street lights work in the UK?

Our outdoor solar lights are manufactured using the latest high-performance LED chipped units and they can perform during both summer and winter. Solar street lamps can be programmed to consistently operate (from dusk until dawn) at any location in the UK so the area can remain safe while conserving energy. Do you need a specific bespoke design?

How do solar streetlights work?

Solar streetlights work by using daylight to charge the battery cells built into the light unit. When night falls the lights automatically come on using energy charged into the batteries in the daytime. There is no requirement for any mains electricity to be wired to the lighting columns.
