What is solar greenhouse?

The aim was to design and build a system that could be replicated in both rural and urban areas. Solar Greenhouse is the result of the investigation and search of new ways of adapting to modern life and withstanding future food and energy crises, reinterpreting the way we meet our most basic social needs in a more ecological way.

Who is the photographer of the solar greenhouse?

The photography is by Adrià Goula. Students and researchers at the Institute for Advanced Architecture of Catalonia have designed a prototype Solar Greenhouse for energy and food generation.

Where is the solar greenhouse project located in Barcelona?

The Natural Park of Collserola, on the outskirts of Barcelona, is the setting for the Solar Greenhouse project, carried out by a team of students, professionals, and experts of the Masters programme in Advanced Ecological Buildings and Biocities (MAEBB) of the Institute for Advanced Architecture of Catalonia (IAAC) Valldaura Labs.

How do I choose a greenhouse?

Style: Decide whether you would like an attached or a freestanding structure. South facing attached greenhouses are excellent passive solar collectors, providing substantial heat for the greenhouse. The soil, plants and moisture absorb most of the heat. Do not plan on moving hot air to the adjoining structure.

How many levels does a greenhouse have?

The structure comprises two levels and features solar panels on its roof. The greenhouse is a simple, timber-framed structure with two levels, topped by glass panels and solar panels and wrapped in glass louvres that provide light and ventilation.

The novelty of the solar greenhouse configuration consisted in using a forced ventilation system to provide hot air for sludge drying and the utilization of solar irradiation for energy supply.
