

Rail and Panel Installation. The cheapest and most practical way to install solar panels is with a combination of rails and brackets. A secure hook is fastened to the rafters underneath your roof tiles and the rails are attached to these exposed hooks across the length of the solar array.

The environmental impacts associated with construction phase of the Project include generation of wastewater, noise and vibration, air quality deterioration due to gaseous emissions and dust, generation of solid waste and hazardous waste including the waste generated from broken/damaged solar panels and accidental spills and leaks.

Project Report (Draft) Project code 2016EF22 Detailed Project Report for Installation of Grid-Connected Solar Rooftop Power plants at GHMC Buildings Prepared for Greater Hyderabad Municipal Corporation Hyderabad, Telangana State
