

photovoltaic intelligent capture system adopts double-axis tracking solar device to make the solar panel always perpendicular to the sun rays. The near-ground and low-speed wind power generation

The greatly increased use solar photovoltaic (solar PV) panels has been a great success in the UK over recent years, and even though this is now threatened by the present Government's big cut-backs, the technology still represents business opportunities for enterprising electrical installers. Here, James Hunt takes a look at the associated installation equipment ...
