

Can solar panels cause a roof to leak?

The installation of solar panels on your roof can be an exciting time as it means you will be cutting down your energy costs considerably, but doing this will involve drilling holes in your roof, which could beg the question of whether this will cause your roof to leak? There are various reasons your roof could leak after installing solar panels.

How do I fix a roof leak after installing solar panels?

If you're experiencing roof leaks after installing solar panels, contact a professional roofing contractor who specializes in solar panel installations for a thorough inspection. They can identify the source of the leaks and recommend appropriate solutions.

Why do solar panels leak?

Older roofs or roofs with existing damage may be more susceptible to leaks under the added weight and penetration of solar panels. Flashing issues: Flashing is used to create a watertight seal around roof penetrations such as vents, chimneys, or skylights. If the flashing is damaged or improperly installed, it can cause water to seep in.

Do solar panels damage your roof?

While solar panels themselves will not inherently damage your roof, an improper installation can lead to problems down the line. It is crucial to ensure that the installation is done correctly by a professional, or with thorough research and proper planning if you choose to do it yourself.

What causes a roof leak?

There could be any number of causes for a leak, including damage caused by walking on the roof, dragging solar panels, or having a tile break in the underlayment. These are not issues you can resolve yourself, and since your warranty would cover these issues, your first call should be to your installer.
