

What is a solenoid operating valve?

Solenoid operating valves are used in many applications to facilitate processes that require automatic or remote control of valves. Butterfly Valves & Controls offers Namur & Inline Solenoids. These valves provide superior operation with high flows, wide temperature ranges, and corrosion resistance for long term use.

What is a solenoid-pilot valve?

Solenoid-pilot valves utilize an internal or an external source for its pilot signal. An internal pilot source utilizes the main body media as the source of the pilot signal. A valve that uses an external pilot source does not utilize the main body media rather requires a separate, external pressurized source for the pilot signal.
