

What tariffs does good energy offer?

Good Energy offers two export tariffs for customers with solar panels, rewarding them for the electricity they export to the grid. This variable tariff offers a premium rate of 40p per kWh for customers who have had both solar panels and battery storage installed by Good Energy.

What is the best solar energy export tariff?

The best overall export tariff is Intelligent Octopus Flux. With this tariff, customers who choose Octopus as their energy supplier can typically gain 29.4p for every kWh (kilowatt-hour) of solar electricity they export between 4pm and 7pm, and 22.1p per kWh at all other times.

How long do solar panels stay on a fit tariff?

Customers who signed up to a specific FIT rate were guaranteed to stay on that tariff for 20 years (reduced from 25 at launch), but customers who installed solar panels on their properties later continue to get a significantly lower return than those who installed them at the peak in 2010-2012.

What is a good energy variable tariff?

This variable tariff offers a premium rate of 40p per kWh for customers who have had both solar panels and battery storage installed by Good Energy. The rate is fixed for 12 months, after which customers are automatically transitioned to the standard Solar Savings tariff at 15p per kWh. Be a Good Energy electricity customer.

Which energy companies offer higher electricity tariffs?

Octopus, Scottish Power, EDF, and E.ON, for example, all offer higher tariffs to households that receive electricity from them. Meanwhile, OVO, Good Energy, and So Energy offer preferential SEG rates to homeowners who have used them for solar panel installation.

What is Octopus Energy tariff?

This tariff is simple, with no variable rates or complex requirements, and is perfect for those who want hassle-free payments for their solar energy exports. Best choice for those who prefer assurance and consistent pricing, opt for Octopus Energy's flat rate of 15p per kWh. Own solar panels installed by a certified installer.
