Multilayer ceramic capacitors are generally superior in ESR and ESL characteristics to other kind of capacitors. We can provide LW Reversal Decoupling Capacitors (LWDC(TM)) that have even more lower ESR and ESL than general ceramic capacitors. Please try them in your application.

However, they are more expensive and have a shorter life span than ceramic. What are tantalum capacitors and ceramic capacitors? A tantalum capacitor is an electrolytic capacitor. The tantalum plate is the anode and a

special tantalum oxide layer acts as the dielectric material, enabling higher capacitance values in a smaller size.
