

Who makes the first battery Gigafactory in Taiwan?

GUS Technology launches Taiwan's first battery gigafactory. Dr. C.C. Chang, chairman of GUS Technology said: "GUS is proud of Made in Taiwan (MIT). The design, manufacturing process, and site planning of the first gigafactory in Taiwan have been carried out with two fundamental elements in mind: local talents and international standards.

What is Gus technology's new battery Gigafactory?

As the first battery gigafactory in Taiwan, GUS Technology's new facility has two buildings, a main production base to manufacture lithium battery cells, and a R&D center that is mainly responsible for the technology development of new generation batteries.

How has Gus technology impacted Taiwan's energy industry?

"With the integration of Taiwan's industrial resources and talents with innovative resources and core technologies, GUS Technology has enabled Taiwan to secure a key position in the international energy market with its high-end and customized R&D capabilities. The world will soon see Taiwan's battery R&D innovation and manufacturing strength."

Does Toshiba have a battery business in Taiwan?

Okada Yoshihiro, general manager of Toshiba's battery business department, said in his speech at the opening ceremony: Toshiba has long regarded Taiwan, which is friendly with Japan, as the most important customer area, and is also committed to using its battery technology and products to solve various problems in Taiwan.

Can Gus technology solve Taiwan's environmental problems?

Toshiba firmly believes that the batteries produced by GUS Technology can help solve the environmental problems not only for Taiwan, but also the world," said Okada Yoshihiro, general manager of Toshiba's battery business department.

What materials are used in next-generation NCM batteries?

Gus also focuses on developing battery materials used in next-generation NCM batteries, which compose of lithium, nickel, cobalt and manganese.
