If your battery is low, try recharging from solar or the included AC wall charger before connecting to your laptop. Alternatively, if you have a USB Type C laptop and the laptop is full - the V88 battery pack will not provide any power. Try letting your laptop drain below 90% and then plugging into the USB-C port. Your laptop should begin charging.

The Voltaic USB Battery Packs are designed to charge most USB devices including smartphones, tablets, DSLR cameras, and microcontrollers. To charge your device, simply plug into either of USB outputs. These battery packs can recharge via any USB port or from a Voltaic 5-6V solar panel. Battery packs can be charged while charging your device.
