

The truth about the national subsidies for rooftop solar panels

Could a government subsidise solar panels?

Millions of homes could be offered grants and cheap loans to install solar panels as the government scrambles to hit its 2030 clean energy pledge. Ministers are reportedly drawing up plans to subsidise the cost of fitting solar panels and batteries in houses across the country in a bid to meet one of Sir Keir Starmer 's key election pledges.

Do subsidies affect people's willingness to install solar panels?

Analysis of data from the past 15 years shows that subsidies do have a significant impact on people's willingness to install solar panels. Introduced when the Labour Party was last in power in 2010, the Feed-in Tariff (FIT) scheme aimed to encourage the uptake of solar by paying homeowners for the electricity they generated.

Could solar panels be repaid through bills?

And, under plans being developed in Whitehall, fuel-poor households will be given upfront grants to install solar panels and batteries, while others could receive cheap loans to cover the costs of the work, it has been reported. The loans could be repaid through bills, but at a lower cost than households are currently charged for electricity.

Are there government grants for solar panels?

We will update this page as and when there is an official change in policy. There are no government grants specifically for solar panels, but are more steered towards improving energy efficiency. All is not lost, though, as some grants can be used to install them as part of energy efficient upgrades.

Will homeowners be able to install rooftop solar panels more easily?

Homeowners will be able to install rooftop solar panels more easily without costly planning delays. This was published under the 2022 to 2024 Sunak Conservative government. Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today.

How much are solar subsidies costing the UK?

Domestic solar subsidies were said to be costing households about £7 a year. The industry said the planned cuts announced in the summer have already cost 6,500 jobs. The government estimates that between 9,700 and 18,700 solar jobs could be lost as a result of the changes to subsidies.
