

How much money does Japan spend on storage batteries?

Japan's government has committed to supporting 12 projects related to storage batteries, including those focusing on battery parts, materials, or production equipment, with subsidies of up to 350 billion yen (\$2.44 billion).

Will Japan give more subsidies for electric-vehicle battery production?

TOKYO (Reuters) -- Japan will hand out more subsidies for electric-vehicle battery production, pledging as much as \$2.4 billion in support for related projects by Toyota Motor and other major companies, as it seeks to strengthen its battery supply chain.

Will Japan bolster EV battery production?

Japan's latest commitment to bolster electric vehicle (EV) battery production comes on the heels of previous government efforts, including nearly \$1 billion in subsidies pledged in June 2023 and an initial batch of subsidies rolled out in April 2023.

Will Toyota invest \$1 billion in storage battery production?

The latest support comes after the government pledged nearly \$1 billion in subsidies for storage battery production in June last year. Toyota would invest a total of \$1.25 billion in two subsidiaries to build battery plants in Hyogo and Fukuoka prefectures.

Will Toyota build EV batteries in Hyogo and Fukuoka?

Toyota would invest a total of \$1.25 billion in two subsidiaries to build battery plants in Hyogo and Fukuoka prefectures. However, a Toyota spokesperson said the automaker has not made any announcement regarding such projects, adding it has been making various efforts to increase the production capacity of EV batteries.

How will Japan's new battery production plan impact the battery industry?

Japan's government-backed initiative is expected to significantly increase the country's annual production capacity for storage batteries, boosting it by around 50% -- from 80 gigawatt-hours (GWh) to 120 GWh.

The largest electric arc furnace operator in Japan, Tokyo Steel will continue to sell its SS400-grade, base size H-beam for \$77,000 (\$662) per tonne, on a free-on-truck basis. Prices for its SPHC 1.7-22mm-thick hot rolled coil and its SS400 9-40mm heavy plate will remain at \$63,000 (\$542) and \$72,000 (\$619) per tonne, respectively.
