

Is Tunisia launching its first solar PV charging station for electric cars?

Tunisia has inaugurated its first solar PV charging station for electric cars at the country's National Agency for Energy Management (ANME). This project includes a solar photovoltaic station with a capacity of 3kWp and storage batteries.

How many EV charging stations are there in Tunisia?

Deputy Director in charge of Energy Efficiency in the transport sector at ANME, Abdelhamid Ganouni, said that by 2025, Tunisia's goal is to increase the number of electric vehicles to 5,000. The country is also aiming to install 500 EV charging stations. Overall, current charging stations are mainly located in Tunis, Sousse and Nabeul.

Who commissioned a solar power station in Tunisia?

The station in question was commissioned with the support of battery manufacturer ASSAD, car manufacturer BYD, a 100% Tunisian photovoltaic panel manufacturer, Alphanis, and solar panel installer SUN SOLUTION.

What changes have been made to electric car recharging equipment in Tunisia?

Customs duties on electric car recharging equipment were cut to 10%, while value added tax was reduced to 7% from January 1 to December 31, 2023, according to Article 24 of the 2023 Finance Act, published on December 23 in the Official Gazette of the Tunisian Republic (JORT).

How many electric cars are there in Tunisia?

Hanchi said there are currently nearly a hundred electric cars on the road in Tunisia, the majority of which are imported by offshore companies. The Tunisian government has been attempting to encourage the adoption of electric vehicles through tax cutting measures.

How can Tunisia speed up the adoption of electric mobility?

Ganouni said measures to speed up the adoption of electric mobility in Tunisia include the granting of bonuses to encourage the purchase of electric vehicles from this year up until to 2025. These premiums amount to 10,000 dinars (around \$3,208) per car.

Mr. Waleed AlHallaj, the Chief Commercial Officer of H2 Global Energy, commented on the significance of this project: "This is a strategic project that not only aligns with our commitment to sustainable energy but also underscores Tunisia's potential as a leader in green H₂ and ammonia production. We are excited to work together with the Tunisian ...

Tunis/Tunisia -- The first photovoltaic charging station for electric cars was inaugurated on Friday at the seat of the National Agency for Energy Management (ANME). This project, which includes a photovoltaic ...

The mobile energy storage vehicle (MESV) has the characteristics of large energy storage capacity and flexible space-time movement. It can efficiently participate in the operation of the ...

THE BENEFITS OF Battery Energy Storage Solutions (BESS) BESS technology helps improve energy flow at every stage of the energy transmission chain. It can: reduce generation costs. ...

The Renewable Energy market in Tunisia is projected to grow by 0.21% (2025-2029) resulting in a market volume of 640.40m kWh in 2029. ... Car brand market share worldwide 2023 ... Conventional ...

Progress at all five of the large solar photovoltaic concessions first launched in 2019 is an indication that Tunisia's renewable power sector may be moving forward despite extremely difficult political conditions. Scatec's ...

Wallyscar is a Tunisian car manufacturer, founded in 2006 [1] and based in Ben Arous. Production is 600 units per year. [2] Wallyscar vehicles are mostly used and present in Africa, Europe and the Middle East. [1] The company sells in ...

This project, which includes a photovoltaic station with a capacity of 3 kWp, storage batteries and a 22 kW recharging point, will be used to recharge ANME's electric car, which is used to distribute the agency's mail ...

Review of Key Technologies of mobile energy storage vehicle ... [1] S. M. G Dumlao and K. N Ishihara 2022 Impact assessment of electric vehicles as curtailment mitigating mobile storage in high PV penetration grid Energy Reports 8 736-744 Google Scholar [2] Stefan E, Kareem A. G., Benedikt T., Michael S., Andreas J. and Holger H 2021 Electric vehicle multi-use: Optimizing ...

Tunisia: Energy intensity: how much energy does it use per unit of GDP? Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions. However, some energy consumption is essential to human ...

Tunisian utility STEG is planning to build a 400-600MW pumped hydro energy storage plant, for a 2029 commissioning date. STEG, or the Socié<#233;té<#233; tunisienne de l'é<#233;lectricité<#233; et du gaz (Tunisian Company of ...
