

How do I control my laptop battery usage?

To further control your battery usage, go to Settings > System > Power & sleep. Here, you set how long before your screen goes blank or your computer goes to sleep, both under battery power and when plugged in. The options range from one minute to never.

How do I Manage my battery & power settings?

You can further manage battery and power settings if you right-click on Battery saver and choose Go to Settings (or open Settings > System > Power & battery) The Power & battery screen shows the current charge for your battery, the estimated amount of time left before the charge is depleted, and the level over the past 24 hours.

How do I Turn on battery on Windows 10?

Open Settings. Click on System. Click the Power & battery (or Power) page on the right side. Click the "Lid & power button controls" setting. Use the "Closing the lid will make my PC" option for "On battery" and "Plugged in" and choose one of the following options.

How do I Turn on a battery & power button?

Open Settings. Click on System. Click the Power & battery (or Power) page on the right side. Click the "Lid & power button controls" setting. Quick note: The name of settings might be slightly different depending on the capabilities of the device.

How do I keep my laptop battery charged?

If you want to preserve your battery charge, keep the settings for battery power on the low side, maybe an hour or two before your screen dims and two hours before your PC goes to sleep. If you're using Windows 11, click the battery icon on the System Tray. The number in the bottom-left corner displays the current battery charge.

How do I Manage my battery usage on Windows 10?

Open Settings. Click on System. Click the Power & battery page on the right side. Under the "Battery usage" section, select the app, click the menu (three-dotted) button, and select the Manage background activity option. Quick note: You can only change the power settings for apps you acquired from the Microsoft Store.
