

Should guidance on solar PV be included in the National Policy Statement?

The solar industry very much welcomes the addition of guidance on solar PV to the National Policy Statement for renewable energy infrastructure. However, there are several provisions which could be strengthened, which we have outlined below.

Should a new home require solar PV panels?

The 2023/24 consultation on the detailed specification for the FHS sought views on whether to require solar photovoltaic (PV) panels for new homes. Solar PV generation turns the sun's energy into electricity. Option 1 would have required solar PV panels covering the equivalent of 40% of a new home's ground floor area.

Should solar planning rules be changed?

The solar industry has welcomed proposals to change planning rules for solar projects. The paper seeks to, "direct decision makers to give significant weight to the benefits associated with renewable and low carbon energy generation, and proposals' contribution to meeting a net zero future.

What is a solar photovoltaic Bill?

A Bill to require the installation of solar photovoltaic generation equipment on new homes; to set minimum standards for compliance with that requirement; and for connected purposes.

Will solar power help the UK's energy independence?

Homegrown, renewable energy projects including solar will help build the UK's energy independence and reduce dependence on volatile fossil fuels - protecting consumer bills and providing clean power.

What is the private members' bill on new homes (solar generation)?

This Library briefing provides an overview of the bill and key areas of debate. The Private Members' Bill on New Homes (Solar Generation), sponsored by Max Wilkinson (Lib Dem), will have its second reading on 17 January 2025. The government has set a mission to make Britain a clean energy superpower.

Tandem solar cells have huge potential. NREL, Author provided (no reuse) The cost of solar electricity. The new record-breaking tandem cells can capture an additional 60% ...

Frontiers in Energy Research is delighted to launch a new article collection series, "Policy in," which aims to provide a comprehensive overview of policy and regulatory ...

Solar energy Latest guides, news and information. Solar energy is an increasingly attractive option for those seeking to reduce their reliance on fossil fuels and move towards a more sustainable ...

According to the International Energy Agency, there are some circumstances where solar photovoltaic (PV) is

now the cheapest electricity source in history. 4 This is ...

Other innovations have explored integrating solar generation into our urban environments, including solar windows ing a transparent solar technology that absorbs ultra ...

A Bill to require the installation of solar photovoltaic generation equipment on new homes; to set minimum standards for compliance with that requirement; and for connected purposes.

In addition, solar energy's sustainability support is another strong point that the masses are looking forward to adopting. On top, access to a reliable energy source in remote areas is ...

including potential impacts of greenhouse gas mitigation policies on the deployment of solar energy technologies. Finally, key conclusions are drawn in Section 7. 2. Current status of solar ...

Solar energy is the conversion of sunlight into usable energy forms. Solar photovoltaics (PV), solar thermal electricity and solar heating and cooling are well established solar technologies. ...

deploy 54GW of solar by 2035 to keep on track to deliver net zero by 2050. This equates to roughly 40GW of solar by 2030, and the solar industry body, Solar Energy UK, has ...

Solar Energy UK has published new analysis setting out a roadmap to treble solar PV capacity over the next eight years. The new report titled Lighting the way reveals the policy and regulatory changes required to unleash the potential of ...
