In general, you can store lithium-ion batteries in the garage if the garage is dry and temperature controlled. In general, you should be careful about storing your lithium-ion batteries in a shed, even if you live in a ...

I still have the same battery; it crtanks well, never runs out of juice if the car takes a bit of starting, and fits perfectly in the E Type battery holder. With the labels off, it's black. Only 50 amp hour I think, (car away at the moment) but does the job perfectly. And 13+ years and counting. Bet it packs up now after that build up!
