What is a solar & wind-powered AED cabinet?

Our innovative solar & wind-powered AED cabinet is self-powered, secure, & ideal for remote areas. Ensuring reliable defibrillator access without external power

Can a wind turbine power a heating cabinet?

Although we initially desired an exclusively solar-powered cabinet it quickly became apparent that in the winter the UK does not receive enough sunlight to power a heating system. Therefore, the addition of a wind turbine ensures that the cabinet will work all year round. Turbines for every scenario

How do I install a solar & wind powered defibrillator cabinet?

Before installation, you need to cast a concrete base for the complete solar and wind powered defibrillator cabinet and set a sub-frame in the concrete for the cabinet to bolt down to. All fixings are securely housed within the battery compartment, ensuring that there are no accessible external fixings.

How many batteries can a pylontech cabinet hold?

Cabinet for maximum of 4 Batteries (Pylontech/SolaX): for Pylontech Lithium Iron Phosphate US2000B Plus 2.4 kWh Battery: Batteries not included.

Can I charge my battery with solar and wind?

Optional Remote Monitoring The combination of solar and wind will provide the required charging for the battery. However, issues can still occur. To counter this we have developed a fully remote monitoring system. This system uses the mobile phone network to report back to us with the cabinet status on a daily basis.

For cabinets that use a electronic keypads to open the cabinet it is advisable that they have a battery backup system in the event of a power failure. Solar power - is ideal for off grid locations such as golf courses, parkland, large estates and ...
