

Does South Africa have a lithium-ion battery manufacturer?

While South Africa has no lithium-ion battery cell manufacturers, several companies are involved in battery pack assembly. Demand for all types of batteries is also expected to come from the rollout of renewable energy projects.

Where will a lithium-ion battery plant be built in Malaysia?

The plant will be built in Kedah state. According to a joint statement from the Malaysian Investment Development Authority (MIDA) and EVE, it will focus on producing cylindrical lithium-ion batteries for power tools and electric two-wheelers.

What is the Goulamina Lithium Project?

The Goulamina Lithium Project (Goulamina) is a spodumene project with development underway, located 50km west of Bougouni in Mali with all approvals and key permits received to bring the project into production. An updated Definitive Feasibility study (DFS) was completed in December 2021.

Where does lithium come from?

Lithium is found in various naturally occurring sources, including brine deposits, hard rock minerals such as spodumene and petalite, and clay deposits. A 50/50 joint venture with Leo Lithium and Ganfeng, the Goulamina Lithium Project in Mali is West Africa's first spodumene producer to supply the booming lithium-ion battery industry.
