Why don t you install solar panels on the roof

Can you put solar panels on a roof?

Any panels that go on your roof are limited by the roof's design. For instance,your roof may run east to west instead of north to south. This means you don't have a south-facing surface to use when you install. As a result,you can't take advantage of the maximum amount of sunlight.

Do you need a bulky rooftop solar installation?

Luckily,you don't have to choose between a bulky rooftop solar installation or nothing at all. Homeowners have several options to make use of the sun's energy,from backyard solar panels to solar pergolas and beyond. Many of the best unique solar panel placement ideas integrate seamlessly into a home's exterior. Ready to dive in?

Can you install rooftop solar panels if you have a loft space?

It's much easier to get rooftop solar panels installedif you have a loft space. This way,installers can look at the underside of your roof beforehand to check its structure and pinpoint where the rafters are,then look afterwards to make sure the felt isn't torn and the bolts have gone straight into the rafters.

Do you need planning permission to install solar panels on a flat roof?

Thanks to recent changes to permitted development rules,most installations on flat roofs won't needsolar panel planning permission. So long as the panels aren't visible from the street and don't exceed 200mm above the roof,they should be covered under permitted development rights.

Can solar panels be used on a garage or rear extension?

The common perception is that solar panels are only suitable for a classic south facing pitched roof,but if the roof of your home doesn't have the right orientation,can the flat roof of a garage or rear extension be just as effective? In short,the answer is yes,but there are a number of different variables to get right.

Should you install solar panels in a shed or garage?

You might find solar panels look more naturalwhen mounted to a shed or garage instead. Sheds and garages tend to have a more utilitarian feel than a home. If your shed or garage is located behind your home,you can easily install panels there so they have very little effect on your home's profile from the road.
